

Knovel and NCRP Partner to Provide Content Solutions

New York, NY and Bethesda, MD - January 10, 2007 - Knovel Corporation (www.knovel.com), a leading provider of revolutionary Web-based research and information services, announces a new content partnership with the National Council on Radiation Protection and Measurements (NCRP), the premier resource for information, guidance and recommendations on radiation protection and measurements.

Radiation protection and measurements are integral to developments in aerospace and defense, electronics, medicine and medical engineering, public safety and industrial hygiene, and waste management. NCRP has been active in the areas of radiation protection and measurements since its inception in 1929. Through this exclusive content-sharing agreement, researchers will be able to use Knovel's interactive database to search, analyze and manipulate data within NCRP's highly regarded reports and commentaries.

"Our alliance with NCRP underscores the importance and value of providing essential content with advanced workflow solutions. Together, Knovel and NCRP will build on our strengths to enable customers to have the best possible experience finding answers to their questions, accomplishing their tasks, and discovering new information," said Delores Meglio, Editorial Director at Knovel.

Knovel's specialized suite of analytical tools provides researchers with powerful new methods of finding and applying critical information. Engineers rely on Knovel for essential problem-solving data and innovative technology that allows for data extraction, mathematical calculations, tabular data analysis and equation solving.

"Knovel is known for its success in providing innovative and useful research technology and information," said David A. Schauer, Executive Director of NCRP. "Providing our rich content on Knovel will help further the work of corporate, academic and government researchers." NCRP joins McGraw Hill, Blackwell, John Wiley & Sons, Elsevier, Springer, World Scientific, and many other prominent technical publishers as a Knovel publishing partner.

About Knovel

Knovel Corporation (www.knovel.com) delivers reliable research information to millions of engineers worldwide. Over 40 top publishers contribute to Knovel's centralized database that helps researchers quickly locate, analyze and export data. Engineers who use Knovel cite significant time savings, cost savings, and quality improvement.

About the National Council on Radiation Protection and Measurements

NCRP seeks to formulate and widely disseminate information, guidance and recommendations on radiation protection and measurements which represent the consensus of leading scientific thinking. The Council's work has significant impact on almost all national and international activities that utilize or create radiation for medical, industrial and governmental applications; the general public; and various state, national and international groups concerned with radiation matters.
